Recent developments in both the EU and the global legal order call for a reassessment of the role of international law within the European Union. *International Law as Law of the European Union* explores how, and to what extent, international law still forms part of, and plays a role in, the current legal order of the European Union. Recent case law of the European Court of Justice prompted both scholars and practitioners to reconsider the relationship between EU law and international law. This volume reveals the practical development and consequences of this relationship, and places it in a conceptual framework by pointing to key arguments in the current debate. *International Law as Law of the European Union* thus forms an essential guide for academics, students and practitioners interested in the impact of new case law and conceptual thinking on the relationship between EU and international law.
